

SPRAY OILS

TOTAL is the registered holder of the following products:

Citrole 100	Mineral oil used as an adjuvant and insecticide
Herbiplus	Mineral oil with Buffer action, specially developed to be used as an adjuvant with various herbicides

FUNGICIDES

TOTAL is the registered holder of the following products:

Mancozeb	Tridex (wetable powder), Penncozeb (Wetable Granule), Pennfluid (Flowable)
Sulfur	Microthiol Special (Wetable Granule)
Copper Sulphate	Cuprofix Disperss (Dispersable granule), Cuprofix 30 (Dispersable granule with Mancozeb)

DISTRIBUTION

TOTAL's Agrochem products are distributed in the agricultural market by WENKEM S.A. and in the forestry industry by MIDLANDS SPRAYCHEM. Both distributors and TOTAL are members of the Agricultural and Veterinary Chemical Association of South Africa (AVCASA).

FARMING, SAFETY AND HEALTH

The Citrole products can be used in:

- citrus farming to combat scale insects
- as an adjuvant in black spot control
- as a rest breaker on apples/pears/plums (either on their own or with Dormex)
- as aphid control on cotton. Herbiplus can be applied on wheat, maize and sugarcane as a 3 in 1 wetter, penetrator and buffer for herbicides.

The fungicides can be used on various crops for control of specific diseases

QUALITY AND SERVICE

All the products are environmental friendly, bio-degradable and very friendly to most predators. They are cheaper per hectare for pest control compared to conventional products and comply with the specifications of most organic organizations.

TOTAL has an ongoing Research & Development program to ensure continuous development and growth.
